

ASHLAUNCHER UPDATE INSTRUCTIONS

1. Build the new launcher

Run:

```
npm run dist
```

This generates: dist/win-unpacked/

2. Prepare update.zip

Inside dist/win-unpacked, include ALL FILES except:

- AshBootstrapper.exe

Zip the rest and name it: update.zip

3. Upload update.zip to GitHub Release

- Go to Releases → Draft new release

- Create new tag (e.g., v1.0.2)

- Upload update.zip

- Publish release

4. Update version.json

Set:

```
{  
  "version": "1.0.2",  
  "zipUrl": "https://github.com/ashclient/ashlauncher/releases/download/v1.0.2/update.zip"  
}
```

5. Test the auto-update

Launch AshLauncher from Start Menu.

Bootstrapper should:

- Detect new version
- Download update.zip
- Extract files
- Launch new version

DONE — Launcher fully updated.
